Re: **Administrative Permit Amendment Request**
P147-R1, AI-527, Clarification of Permit Language

Freeport-McMoRan Tyrone, Inc. (Tyrone) requests an Administrative Permit Amendment to Title V Operating Permit No. P147-R1, issued by the New Mexico Environment Department, to clarify equipment terminology in the referenced permit.

Tyrone respectfully submits this Administrative Permit Amendment pursuant to 20.2.70.404 A.(1) NMAC to clarify language in Permit No. P147-R1 pertaining to Screening Plants (Units No. SP-7A and No. SP-1A). Tyrone requests that all references to 'Screening Plant' in the permit be amended to read 'Crushing and/or Screening Plant'.

Currently, the Title V Operating Permit sets forth emission limits and operational conditions for contractor owned, permitted, and operated screening plants. These operations, pursuant to the specific requirements in Permit No. P147-R1, periodically produce rip-rap and graded bedding material for a variety of reclamation construction requirements with a total combined process rate not to exceed 1,200 tons per hour. Generators supporting the contractor operated screening plants pursuant to the specific requirements in Permit No. P147-R1 will not exceed 8,760 hours per year or 4,380 hours per year for one generator.

With this amendment, Tyrone wishes to clarify that contractor owned, permitted, and operated crushing plants may also be required to support reclamation and/or operations activities at Tyrone. Crushing and/or screening plants would operate within the limits of the current permit conditions. Tyrone does not propose any process rate or operating schedule changes to these

units; and therefore, no changes in emissions, monitoring, recordkeeping, or reporting are proposed for this Administrative Amendment.

If there are questions concerning this request, please contact Mr. Edward L. Horst at 575.912.5759.

Sincerely,

Timothy E. Eastep, Manager
Environment, Land & Water
